- Structural coring
- CBR & plate load testing
- Health and safety supervision
- Borehole, trial pit and slip trench location clearance
- Soakaway testing
- Rotary open hole drilling and rotary cored drilling
- Cone Penetration Testing with On Track Plant capability

Providing Solutions

From initial contact and through to completing investigations, testing and the production of factual reports, we help you mitigate risks, keeping projects on track and your stakeholders on board.

We operate nationwide with experienced engineers and drilling teams to provide ground investigation, and consultancy support to contractors and consultants.

What to expect

- Punctual, professional, trained and experienced lead drillers.
- Industry leading plant and equipment tailored specific to your project requirements.
- PUWER, LOLER, and calibration certification for plant & equipment.
- Site specific RAMS provided for each project.
- Fully HSE compliant interlocking safety cages and emergency stops.
- Mobilisation to site using our own transport.

Health and Safety

We hold ISO 9001:2015, ISO 14001:2015 and ISO 45001 accreditations and comply with the Health and Safety at Work Act 1974 and associated legislation. We are proud of our **ZERO RIDDOR** status throughout the lifespan of our business.
