## MINOR WORKS • CIVILS & BUILDINGS

We provide ultimate project assurance and protection through continual evolution and innovation via our research and development team, ensuring that we provide efficient solutions meet the needs to our railway clients.

We operate a 24/7, 365 day a year Minor Works reactive call out centre manned by our in-house safety critical staff on a rostered basis with strategic supply chain support across England and Wales.

### CIVILS

- **Reactive:** We operate a 24/7, 365 day a year on call support to deal with issues such as track flooding, cutting slips, embankment failures, level crossing panel dislocation, emergency vegetation removal, provision of emergency haulage and welfare facilities, provision of emergency surveying and asset monitoring, bridge deck parapet wall stabilisation, temporary works installation and provision of project management support to deliver all of the above activities using in-house rostered competent personnel.
- **Metallic Structures:** Provision of OTP under our POS licence to transport metallic structural elements to repair or create new assets such as signalling gantries and columns plus OLE equivalent installation. We also provide a full turnkey service, to assign, design and build a variety of signalling metallic assets.
- **Masonry:** We provide a full turnkey service for the survey, design and repair of masonry culverts utilising in-house specialist resources e.g. UV lining to culvert barrels and masonry repairs to headwalls and wingwalls. Ditto for tunnel wall linings and tunnel drainage assets. We also provide a full D&B service for platform extensions and to platform front wall repairs.
- **Track Drainage:** We provide a full turnkey service for the survey, design, assure and repair of On Track Drainage systems, installation of under track crossings, catch pit reinstatement, flumes, cascades, syphon cleaning and outfall repairs. We execute the above utilising our in-house plant such as high pressure jetting, CCTV survey equipment, topographical and specialist ground investigation, all managed and delivered by our in-house competent drainage delivery specialists.
- **Level Crossings:** We provide a full turnkey service for the survey, design, assurance of new / replacement Level Crossings (LXs) and Road Rail Access Points (RRAPs) service to Network Rail / Irish Rail / Translink and it's Tier 1 Contractors. Level crossing surface repair, signage manufacture and installation. Our LXs design and build team are able to advise on the best products to meet our client's needs, arranging site visits where necessary (via our internal possession planning team). We cater for most track types, working with leading manufacturers Strail and Rosehill Rail.

## MINOR WORKS • CIVILS & BUILDINGS

Our services cover supply, delivery, installation and removal. We also offer RRAP hire which can be used on a short or long term basis.

Our in-house design and build team provide the following services:

- Site survey / Walk-out
  - Topographical Services
  - Sleeper type identification
  - Equipment specification & Quotation
  - Full Traffic Management implementation
  - Installation / Recovery of existing LXs / RRAPs
  - Inspection & Maintenance Services
- **Earthworks:** Our Geotechnical Division operates as a specialist geotechnical survey, design and build contractor offering design & build solutions using our specialist design teams and project delivery staff, utilising our in-house fleet of On Track Plant, such as:
- Topographical Surveys
  - Ecology Surveys & SSSI Assessments
  - Slope Monitoring
  - Ground Investigation including Ground Probing Radar Surveys
  - Access Planning and enabling works
  - Site compound set up
  - ALO Planning
  - Detailed Design & Assurance
  - Drilling & Grouting
  - Soil Nailing & Facing Systems
  - Rock Bolts & Netting, utilising our rope access systems
  - Anchors & Tie Bars
  - Rock Catch Fences
  - Sheet Piling, Bored Piling and Kingpost Walls
  - Earthworks Drainage - Repairs / Installation e.g. flumes, cascades and counterfort drains
  - Reinforced Earth Walls
  - Gravity retaining walls such as Gabion Walls, redi-rock walling, Crib walling
  - Embankment and cutting stabilisation works
  - Land slip remediation
  - Slope drainage systems
  - Lined and unlined ditches
  - Emergency works
  - CEM/CRE Duties
  - Scour Protection works
