

Pro Rail Services

RAILWAY VEGETATION MANAGEMENT SYSTEM

Pro Rail Services provides a full range of On and Off-Track Vegetation Services across the UK Rail Infrastructure.

Our vegetation management teams are highly skilled and trained to the highest degree under the provision of nationally recognised bodies such as the National Proficiency Test Council as well as holding all the relevant Network Rail and LULtrack competencies.

Pro Rail Services owns and operates its own fleet of vegetation management plant, attachments & other machinery.

A number of these are unique RRV's and have been developed by our research and development team.

Pro Rail Services

OTP Vegetation Works:

- Maintenance of lineside vegetation to 11m from running rails
- Specialist OTP Mulcher with long reach capability
- Specialist OTP Flail with long reach capability
- Specialist OTP weed killing
- Transportation of vegetation plant such as log grabs, chippers, saws, rope climbing kit on our RRV trailers under our own POS Licence, with full POS support

Non-OTP Vegetation Works:

- Vegetation survey
- Ecological surveys
- Lineside risk survey
- Tree reports and risk assessments and managed strategies
- TPO Council liaisons
- Clearance of major sites prior to construction works
- Dangerous tree removal and high level clearance from structures
- Chipping & mulching
- Major site clearance for low adhesion & leaf fall sites
- Cess & walkway vegetation control
- Depot vegetation control
- Herbicide application on and off-track weed killing
- Station and car park vegetation control
- Maintenance of lineside vegetation to boundary including rock cuttings
- Maintenance & clearance - in & around structures, track, signals & level crossings
- Autumn Mitigation (Leaf-Fall) site-clearance works
- Overhead Line Equipment wayleave clearances
- Felling, pruning, stump treatment, crown reduction, dealing with hazardous, dead & dying trees
- Third party works outside boundary fences
- Emergency response works

Specialising in working only within the railway environment allows our team to carry out a first class service within the safety constrictions that working in a railway environment will dictate.

We retain our own fleet of trucks designed to execute vegetation management activities, with all waste controlled in accordance with rules associated under our waste carriers licence.
