On Track to Takeoff

## WHY RAIL EXPERIENCE ADDS VALUE IN THE UK AVIATION SECTOR

At **Pro Air Services**, our foundation in complex rail infrastructure delivery provides a unique and highly transferable skill set to support aviation sector projects across the UK. With growing investment in airports, airside operations and sustainability upgrades, we are ideally positioned to bring civil engineering expertise, compliance rigour and logistical excellence to aviation environments.

Our track record in delivering high-risk, time-sensitive rail infrastructure programmes giving us a distinctive edge in supporting projects in and around live airfields, terminals and restricted access zones.

## On Track to Takeoff

### EXPERTISE FROM RAIL TO RUNWAY

#### **Complex Access, Airside Logistics & Haulage Control**

Much like remote or restricted rail environments, airport operations demand precise access planning and execution we provide:

- Experience managing compounds and haul routes within live transport hubs
- Full in-house haulage and plant logistics fleet for airside mobilisation and material handling
- Proven systems to coordinate personnel, vehicles and plant in highly regulated zones

#### **Unrivalled Compliance & Safety Standards**

Operating in the UK rail network has ingrained a safety-first mindset and a mature compliance culture including:

- Zero RIDDOR record since inception
- CDM, behavioural safety and environmental compliance are embedded in all project planning
- Extensive experience working near critical national infrastructure with high security protocols-transferable to airside works and airport estates

#### **Temporary Works & Ground Engineering**

Airports require agile, reliable solutions during upgrade or maintenance periods we offer:

- Temporary runway crossings, haul roads and access structures
- Embankment stabilisation and emergency repair systems
- Ground investigation, survey and civil design, all managed in-house for fast deployment and assurance

#### **Integrated Multi-Disciplinary Civil Capability**

We bring over a decade of experience managing multi-disciplinary packages on live operational networks with the following:

- Civils, drainage, utility diversions, lighting and ducting installation
- Survey and digital data management for infrastructure compliance
- Stakeholder coordination, including Local Authorities, Highways and Tier 1 contractors

#### **Speed, Agility & Mission Readiness**

Aviation projects are often time-sensitive, requiring rapid mobilisation without compromising on quality:

- We deliver 24/7 rapid response through a skilled, cross-functional workforce
- Over 13 years, we've never handed back a rail possession late, demonstrating our culture of discipline, accountability and performance

#### **On Track to Takeoff**

As the aviation industry continues to invest in carbon reduction infrastructure upgrades and digital transformation. **Pro Air Services** stand ready to support that journey with transferable expertise from one of the UK's most challenging infrastructure sectors.
